

# Pharmaceutical & Nutraceutical

Bottles and Caps

**Altium Healthcare** is unique among companies who manufacture HDPE bottles. Using the latest and most advanced equipment we not only manufacture bottles, but also caps and labels. All at our 400,000 square feet facility in Sparta, TN.

## The perfect product packaging solution.

### We can make your caps

AHC offers a variety of cap and liner styles including child resistant, non-child resistant and convertible. See back page for details.

### We can make your bottles

With bottles ranging from 45cc to 1500cc and multiple neck sizes we are confident we have the perfect bottle to fill your needs.

### We can design and print your labels

With one of the largest and most advanced Direct Digital printing operations in the United States AHC can design and produce superior labels.

Why buy bottles, caps, and labels from different sources and substantially increase the risk of costly spoilage and extreme delays? Avoid the "multiple vendors means multiple errors" scenario by working with a single source that will provide **your perfect product packaging solution.**

Altium Healthcare

#### Manufacturing

On-site state-of-art tool and die department capable of designing and rapid prototyping,

Caps are manufactured, designed and tested for perfect operation by AHC.
