At TriMas Packaging, we understand the importance of a brand and the substantial investment and value associated with it. With over 100 years of expertise, we take immense pride in the fact that our global customers trust and rely on our market-leading brands to safeguard their brands throughout the entire life journey of their products.

Our mission is to safeguard and enhance your brand by delivering high-quality packaging solutions that excel in demanding fulfillment channels, promote sustainability and effectively prevent tampering, damages, leakage, unauthorized access by children and counterfeiting risks.

We leverage our expertise to develop solutions that protect your brands and products and elevate them to new heights. We are committed to creating packaging solutions that go beyond protection, empowering your brand with enhanced visibility, appeal and market presence.

PULL OUT SPOUT CLOSURES

Our innovative pull out spout closures are equipped with integrated bails that simplify the process of lifting and extending the spout for effortless and precise dispensing. Our comprehensive collection is organized into three series, each offering a diverse range of features. Specifications vary by product but include anti-glug functionality and tamper-evident features.

Key Features

- Pull out spout for optimum dispensing control
- Tamper-evident tear out diaphragm to ensure product integrity
- Child resistant closure options available
- Suitable for a wide range of applications

Customer Benefits

- Increased security against counterfeiting and manipulation
- Retractable spout for ease of handling and precise pouring every time
- Designed to reduce the risk of misuse by children

Technical Information

- Cap Diameter: 35mm-63mm
- Opening Type: DIN, REL, D/ECO
- Visit our website for detailed information about our individual products

B Series

Our B Series pull out spout closures are specifically designed for metal containers. Many of the B Series closures are press-fit, meaning that they are pressed into the container opening. All of these closures offer industry-leading tamper evidence and are compatible with a variety of industrial products including chemicals, paints, coatings and more. Many of the B Series pull out spout closures also have child resistant features to keep children safe from harmful substances.

K Series

Designed specifically for plastic containers, our K Series pull out spout closures feature a screw-on style closure mechanism. These closures are specifically tailored to meet the distinct demands of individual products, providing essential features such as tamper-evident functionality and child resistance. Our K Series closures are ideal for dispensing automotive oil, lubricants and additives.

FS Series

Our iconic FLEXSPOUT® was first introduced in 1947, revolutionizing the market as the pioneering sealable pouring spout closure. Over the past 70 years, we have consistently enhanced and perfected the patented design to surpass the evolving demands of the market. With its remarkable versatility, our FLEXSPOUT® pull out spout closures can be utilized on both metal and plastic pails, catering to a wide range of applications.

PRESS-FIT CLOSURES

Our press-fit closures provide an ideal solution for achieving leak-proof and tamper-evident seals for use on a variety of small metal and plastic containers used in the automotive, paint and chemical industry. Press-fit closures are firmly pressed onto the container opening to establish a dependable seal. We offer two series of press-fit closures: the ‘B Series’ and ‘HZ Series’.

Key Features

- Child resistant closure options available
- Suitable for a wide range of applications
- Fire-resistant, BLEVE-resistant (depending on the closure)

Customer Benefits

- Designed to reduce the risk of misuse by children
- Increased security against counterfeiting and manipulation
- Ideal for adhesives and viscous products

Technical Information

- Opening: REL, DIN, D/ECO, Aerosol
- Standard colors: white, red, and black
- Customizable color options available
- Visit our website for detailed information about our individual products

B Series

Our press-fit closures are specifically designed for metal containers, offering a reliable solution for sealing small containers in the automotive, paint and chemical industry. Manufactured in Europe, this product series ensures exceptional tamper-evidence for a wide range of applications.

SCREW CAPS

We offer a diverse collection of screw caps designed specifically for plastic containers. Our range encompasses a wide array of solutions, including tamper-evident, child resistant, pour spouts, vented options and combinations of thread and screw-on funnels for the industrial market. Available in sizes ranging from 28mm-70mm in diameter, our screw caps are exceptionally rigid and are constructed with high-quality resins. This ensures that even if your container is dropped or damaged, your product will remain securely contained within.
