**MENSHEN CARES.
FOR YOU AND THE
ENVIRONMENT.**

AT MENSHEN WE VALUE THE EARTH AS AN INDISPENSABLE BEDROCK. FOR US, IT IS NOT ONLY A GOAL, BUT A MATTER OF COURSE TO TREAT IT AS SUCH.

For years, we have put sustainability at the heart of all our actions. Not only do we strive to reduce waste and the required resources, and to reuse and recycle valuable materials; we have gone one step further and are working to reshape our work and products.

WE CALL THAT RETHINKING.

RETHINKING PLAYS A VITAL ROLE IN OUR DAILY WORK.

As a manufacturer of caps, closures, and coffee capsules, we want to rethink things from the ground up and be an innovative partner for both the environment and our customers. For us, rethinking means seeing disruption as an opportunity and seeing new ways of thinking as a driver for action.

FOR US, PROTECTING THE EARTH IS NOT AN IMPOSSIBLE TASK, BUT THE MOTIVATION TO IMPROVE AND FURTHER DEVELOP OUR PRODUCTS.

Integrating an innovative mindset is not just our goal, but rather the benchmark of our day-to-day work at MENSHEN.

That is why for years, we have been trading new and sustainable paths and making environmental awareness marketable. From weld spouts made of mono-material and caps made of recycled plastic to compostable coffee capsules, we offer products that fully meet our customers' wishes and requirements day after day.

SUSTAINABILITY NEVER STANDS IN OUR WAY, BUT HAS BECOME A PARTNER WE WANT TO WALK HAND IN HAND WITH AS WE HEAD FOR THE FUTURE.

We are delighted about your interest in what we are doing.

The MENSHEN team
