● Using Solvent-free Lamination Machine

1 set of 8 colors , 1 set of 9 colors , 1 set of 10 colors

2 sets of Solvent-free, 1 set of Solvent

From 2011 BN Packaging using Solvent-free lamination machine so safety to food packaging and costs lower than solvent lamination !

Printing machine

● Bags and Pouches Making Machine

We have 4 sets of three sides sealed bag making machines, 2 sets of side gusset machines, 3 sets of stand up ziplock machines, 2 set of flat bottom machine!

We have 3 sets of splitting machine, 1 set of hot-stamping machine, 10 sets of install valve/spout machine .

DIGITAL PRINTING

● We have HP indigo 20000 Digital print equipment

MOQ 100,Lead time 3 days | No plate cylinder fee , up to 20 colors

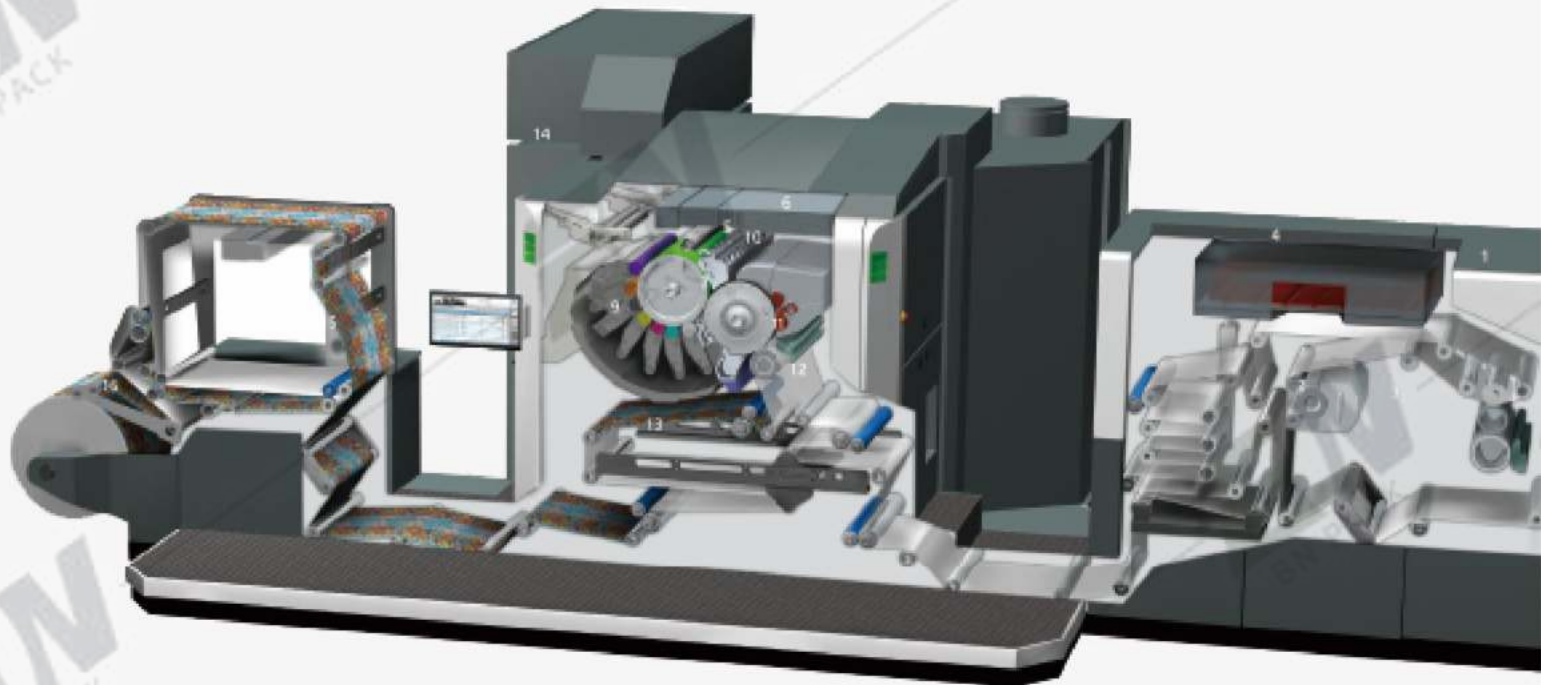

- Leading the industry's digital printing quality and
- high-resolution printing.

Indigo's liquid development (LEP) technology using HP Indigo electronic ink containing fine ink particles forms an extremely thin ink layer between wood and material, providing clear line drawings, attractive image reproduction and smooth double screens.

The Bags and Pouches Making Machine

Indigo meets the demand of brand diversity and easily helps transform brand creativity into goods.

Digital printing simplifies the flexible packaging process and materials , improve productivity , save printing costs.

According to the standard 4-color CMYK or HP Nicherome 6-color mesh in the printer, an additional 7-color mesh is added to reproduce PANTONE colors. In addition, by using HP Indichrome ink mixing system, you can also blend by yourself.

“MULTI BAG STYLE CUSTOMIZED DESIGN”

BIODEGRADABLE POUCH

Kraft compostable bag

PLA is 100% home compostable ,Available for white kraft / black kraft,design is customied.

Bioplastic compostable bag

It can be degraded by microorganisms existing in nature, such as bacteria and molds, under certain conditions.whole bag is made of PLA , available for matte & glossy finish.

Bio-garbage bag

Under compostable conditions, it can be degraded into carbon dioxide, water and organic fertilizer in about 180 days, which can be composted together with kitchen waste, non-toxic and harmless.

Courier bag

The main source of degradable materials is processed into PLA from corn and cassava, which are easier to degrade into water and carbon dioxide in the natural environment. Strong toughness, not easy to perforate.

Biodegradable & compostable packaging bags. Use Natural Kraft Paper/PLA environmentally friendly materials.

FSC certified kraft paper

Reduce carbon dioxide emissions

TUV certified PLA

CHILD-PROOF ZIPPER BAG

Child Resistant Zipper Bag

Our child resistant zipper bag is strictly according to ISO8317 regulation which can keep children away from potentially dangerous products.

Pinch N Slide Bag

These mylar exit bags are renowned for sealing airtight but allowing easy access to adults, making them a valuable upgrade from the classic weed bags. These cannabis bags are airtight and light-resistant, making them ideal for sensitive medications. They are also fully customizable.

Holographic Pouch

Holography employs the use of laser embossed materials to create a visual effect that appears 3-dimensional. From elaborate graphics to subtle patterns, holographic film can help brands stand out from the competition, and even direct the eye to specific areas of the package.

Press-to-Engage Slide Zipper Bag

With a simple "point, press and pull" motion, users open the bag by aligning the slider tongue with the groove, pressing down on the slider's top side, and then pulling the slider across the track. To close, the slider is pulled back to the notch, where it locks into place.

ALUMINUM FOIL POUCH

Introduction to aluminum foil pouch

Aluminum foil packaging bags are widely used. Because aluminum foil has good corrosion resistance, it can be used for packaging food, electronic digital, fruit, liquid, meat, etc., and can be used as common stand-up bags, spout bags, flat-bottomed bags, special-shaped bags, etc. Wait.
