Your Trusted
Packaging Specialist

About Us

SIDNEY INDUSTRIES SDN BHD was established in 1990 and commenced business with Pressblowers / Injection Blow Moulders, 4 Colours Offset Printing Machine, Hot-Stamping Machines and Ultrasonic Plastic Welders. In line with our growth rate, further capital investments were made in 1994 i.e. Pressblowers / Injection Blow Moulders, 5 Colours Offset Printing Machine, Hot-Stamping Machines and Ultrasonic Plastic Welders.

Favourable demands in Year 1999 created another opportunity for us whereby additional Pressblowers / Injection Blow Moulders, Labelling Machines, Hot-Air Plastic Welders and Stretch Blow Machines (PET) were brought into existence.

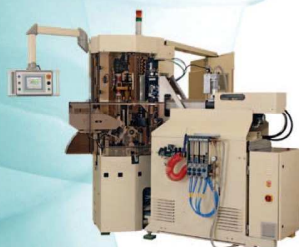

In tandem with the demand for more innovative packaging, we have invested prudently on state-of-the-art machinery PET (Polyethylene Terephthalate) Containers by Sidel, France + Quality Squeeze Tubes production line by Breyer, Germany & Aisa, Switzerland + 5 Colours Offset UV Printing Machine by Calf, Italy adopting the finest technologies of stretch blow moulding, extrusion, compression-heading and offset printing in Year 2001. With this we explored into new packaging namely PET Bottles and pre-multi layers Squeeze Tubes.

As our business grew from strength to strength, we continue to multiply our capital investments. In 2002, 3.28-acre parcel of land was acquired with plans to expand the factory. A Combitool machine from Switzerland worth above RM2 million was brought in. To improve cap-tightness consistency and delivery time, new capping machines were added in 2005.

And we are proud to inform that our business expansion plans for 2009 includes the addition of 8 Colour Stations Flexo Printing Machine by Omso, Italy and a 5-layers Extrusion, Compression-Heading Machine. At this juncture, we are building a new factory to accommodate our continuing expansion and modernisation.

Combitool, Switzerland Machine

Breyer, Germany Machine

Company Vision and Mission Statements

Our vision is to be one of the leading marketers of high quality plastic packaging focusing on opportunities in specific categories of business and act responsibly for the benefits of customers, employees and shareholders.

Our mission is to list in the Second Board in Bursa Malaysia Bhd and achieve perpetual growth rate and profitability that provide a superior returns on investment.

Production Capacity

We are Squeeze Tubes packaging specialist in HDPE/LDPE of various sizes ranging from 20ml to 375ml and PET Bottles packaging ranging from 100ml to 750ml. By year 2009, an increase in capacity of TUBES and PET to 5,000,000 pieces per month.

We have both standard screw-on and flip-top caps with different diameters to suit the range of squeeze tube sizes available. In addition, we provide value-added decoration services for hot-stamping on squeeze tubes and on caps to enhance the elegance of your packaging needs. The squeeze tubes and caps can also be produced with pearl and coloured finish. We also provide quality printing and lacquering up to 8 colour stations on Squeeze Tubes. Labelling on Squeeze Tubes and PET Bottles also for cosmetics, toiletries, pharmaceuticals and industrial applications.

Quality Standard

We were conferred the ISO 9001:2000 and ISO 14001:2004 accreditation by SIRIM, one of the most respected standards around the world for quality on 19 January 2000 and 27 August 2007 respectively. We strive for excellence in quality, service and development.

The manufacturing area is fully air-conditioned, thus our packaging are being produced in clean environment. Our products undergo stringent quality inspections before goods are being released to customers. All the products are packed into standard plastic bags and corrugated cartons.

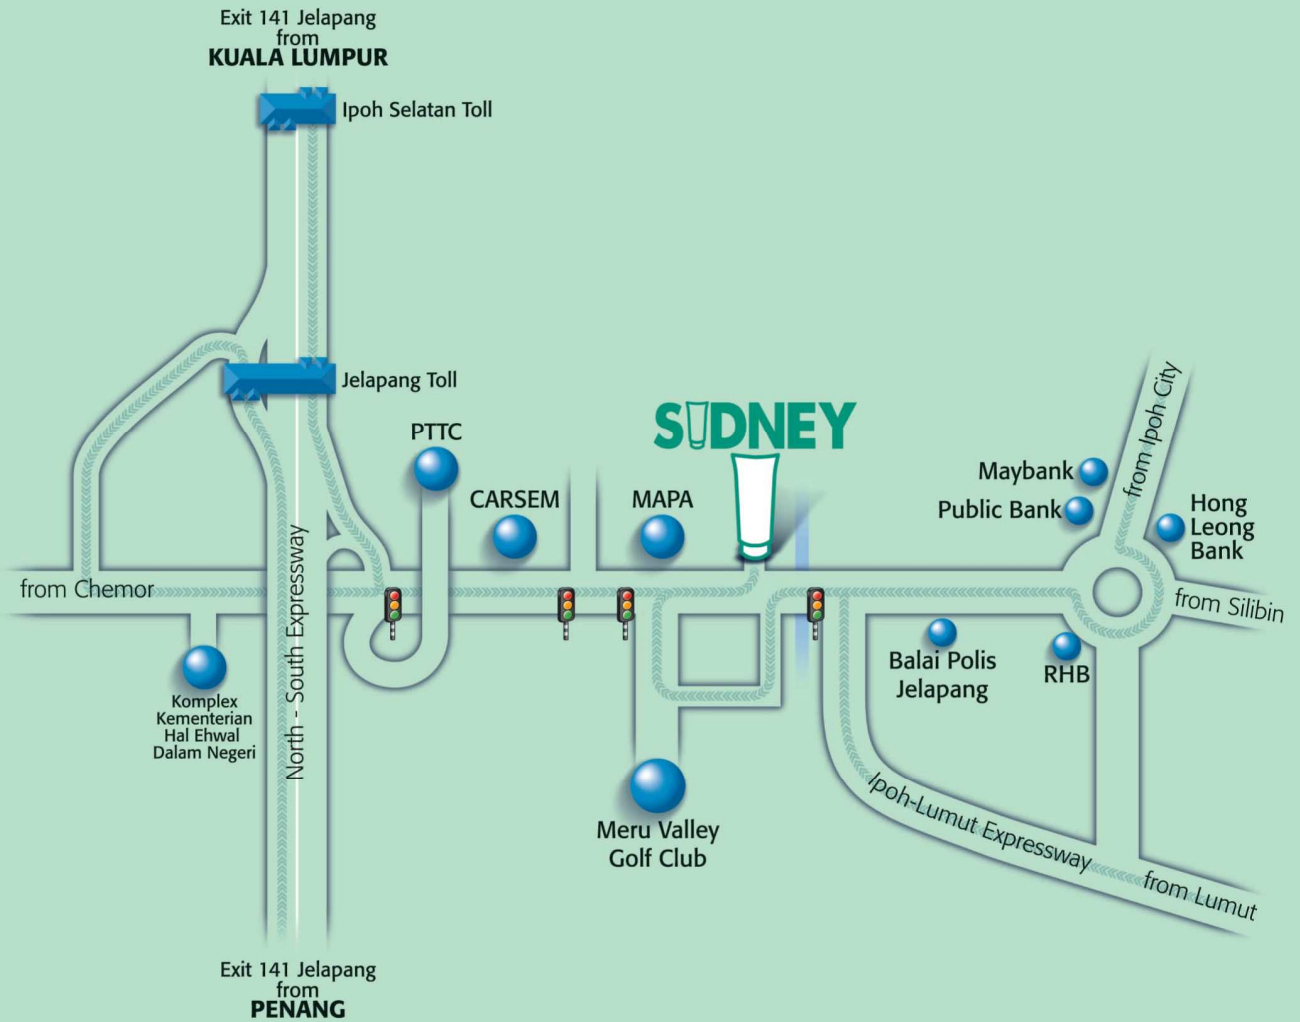

Quality Policy Statement

SIDNEY INDUSTRIES ensures both quality products and on-time delivery to our customers.

QUALITY value is an in-built company's culture practiced by all levels of employees.

WE continuously review and improve our business process to achieve total customer satisfaction through joint responsibilities.
