FRAPAK
Packaging Experience

Introduction

Frapak Packaging, the hybrid packaging specialist with a vast history in both manufacturing and distribution of packaging, guaranteeing you the best solution to pack and promote your product.

Sustainability Statement

Frapak Packaging is the leader in plastic packaging which is supplying recycled mono materials and believing in a circular plastic packaging industry.

Our goal is to inform the customers about the sustainable possibility to close the loop and serve a circular economy together with our clients.

Production

Dedicated Frapak production facilities in Europe guarantee flexible and steady supply of packaging for several market segments such as Cosmetics, Pharma, Chemical and Food. Customers can be supplied from both standard and custom made product ranges.

Frapak offers a wide and expanding range of standard packaging solutions in close collaboration with its partners in Europe. Combined with the right logistic solutions, this collaboration results in short and reliable lead times. A large number of standard products can also be supplied directly from its extensive warehouse.

Brands

Sinds 2010 Frapak Packaging has expanded to also offer PET products through the FlexPET company. In the same year, Frapak packaging has also widened its portfolio by adding Scanbech products. Together with these two brands we can supply a wide program of plastic packaging in Europe.

Distributors

Proud to be distributors for Silgan Dispensing www.silgan.com and Canyon Europe Ltd www.cayoneurope.com in the European market.

Download our Brochure and follow us on LinkedIn.

ISO

Frapak received its first quality certificate in 2003. The complete process of development, production and supply has been certified by Lloyd's Register in accordance with ISO9001:2015.

New tooling

Aside from its standard program, Frapak develops special packaging solutions to meet the customers requirements.

Custom made tooling can be developed for an annual quantity of 150,000 units combined with a three year contract period. A fully integrated 3D design studio and in house rapid prototyping give customers a quick start to a packaging project. This design process combined with dedicated mould makers ensures that the customer is able to achieve a cost-effective packaging solution in the most effective timeframe.

Processes

Frapak Packaging can offer packaging solutions from a wide array of processes:

- Extrusion blow moulding PE, PP, PET-G, PVC, R-HDPE
- Injection moulding PET, PP, PS, SAN
- Injection stretch blow moulding PET-E, R-PET

Complete Packaging Solutions

Frapak is not only an individual packaging supplier, but has extensive experience in developing complete custom product lines for its customers.

In house printing and customization

As a complete packaging supplier Frapak is offering to customers screen or tampon printing on bottles, jars and lids. To customize the packaging even more, Frapak is also able to offer metalization, lacquering and hot foil stamping.
