

# CERBO CLASSIC BIO

New, renewable, sustainable and eco-friendly range

## A range produced from sugarcane

The Cerbo Classic range has been Nolato Cerbo's best-selling range in recent years. To contribute to a better environment, Nolato is proud to introduce our bio-based Polyethylene packaging produced from sugarcane – Cerbo Classic Bio.

## Meets the requirements for food supplement

It is a new, renewable, sustainable and eco-friendly range covering both bottles and caps and is also available in different colors. The Bio range is fully recyclable and meets the requirements for food supplement. Cerbo Classic Bio has been validated with biobased Polyethylene made of sugarcane and all product properties – mechanical, functional, recycling – are identical to those of petrochemical resins.

**CAP:**  
**>90%** CL cap  
**>80%** SC-Light cap  
 Biobased HDPE/LDPE

**BOTTLE:**  
**>90%**  
 Biobased HDPE

Made of sugarcane

Meets the requirements for food supplement packaging

Available in colours

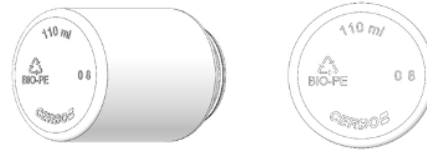

Fully recycabel

**I'm green**<sup>TM</sup>  
 BIO-BASED  
I AM MADE OF SUGAR CANE

**Bio-based content**

- >90% in bottles
- >90% in bottles with CL cap
- >80% in bottles with SC-Light cap  
(The inner part is being approved during 2021 and SC-Light cap will then reach >90%)

Determined by ISO 13833:2013 analysis.

You will find the marking "BIO-PE" at the bottom of the bottles; this verifies the use of the environmentally friendly Bioplastic.
