TOTE
100ml - 150g

PUSH-UP, FROM WINE TO FRAGRANCE

Our experience in the wine market allows us to understand that bottle push-ups can be used to make bottles bigger, with a more premium looking, and without compromising their weight in comparison with glass accumulation techniques.

EASY REFILL, EASY RECYCLE

The screw version offers the possibility of refilling and separate the pumps from the glass bottle for an efficient recycling.

HOME FRAGRANCE

Among the different options for the Bubbles Collection we also have the perfect mikados version for Home Fragrance.
