

GERRESHEIMER

Unique Syringe Accessories: Gx TELC®

Modern drug delivery solutions for best ease of use

Close partnership, technical support and comprehensive service

Gerresheimer offers a comprehensive range of prefillable syringe systems as well as the relevant accessories to ensure ease-of-use and end-user safety. Part of our unique syringe accessory portfolio is the Gx TELC® – the Tamper Evident Luer Lock Closure – which combines the standard features of a conventional luer lock syringe closed with a tip cap with additional tamper evident features.

PRODUCT OFFERING

- Patented integrated luer lock closure system
- Consists of a luer lock adapter, a screwed in closure cap and an elastomer insert providing the contact surface to the drug product
- Guided twist-off motion
- Easy grip with comfortable soft touch haptic
- Integrated TPE flags of closure cap provide tamper evidence feature by indicating first opening
- No accidental opening during manufacturing and filling
- Elastomer insert is sealed against UV light and aggressive atmospheres like ozone
- Excellent sealing properties by preload of rubber insert
- High functional reliability due to precise dimensions
- Specified endotoxin, particle load and bioburden
- Available as bulk product (unsterile) or assembled on an RTF® syringe (Ready-to-Fill)
- Standard color of twist-off cap is grey, customization possible
