

PILBOX®

The pill box for taking your treatment exactly as required

Our products are available in pharmacies and specialist stores
PILBOX® is a Stiplastics brand

PILBOX® pill dispensers help you organise your treatment on a daily basis, for effective, safe monitoring, whether at home or on the move.

Therapeutic success depends on strict compliance to your treatment:

Today, 1 person in 2 suffering from a chronic disease does not adhere properly to their treatment:

- **58%** alter their medical prescriptions,
- **21%** alter the prescribed therapeutic doses,
- **36%** alter the duration of treatment.

The consequences of non-adherence can be serious: deterioration in state of health, increase in doses of medication, hospitalisation, etc.

The pill dispenser is recommended by healthcare professionals:

The use of the pill dispenser to manage medical treatments is recommended by the WHO (World Health Organisation) as it allows the patient to adhere to the main rules of proper observance:

- Compliance to dose times,
- Compliance to number of pills to be taken,
- Compliance to prescribed doses,
- Compliance to treatment duration.

Our entire range of pill dispensers, developed with healthcare professionals, offers essential features:

1 Easy and safe to use:

- in one go, you open the module to take your medication,

- a safety device on each lid (day/night blockage) avoids any confusion during use.

Day-time direction of opening: 
The lid opens on 3 day-time squares and is blocked for the fourth.

Night-time direction of opening: 
The lid opens on 1 night-time square only and is then blocked.

2 An ergonomic design thought-out to the smallest detail:

- fixed squares to avoid any confusion when preparing your treatment,
- an easy-to-use lid.

3 Sensory markers to make taking pills easier:

- indication of days and pictograms,
- tactile markers indicating what to take and when.

4 A customizable medical chart: for recording important information.

Liberty →

One week's treatment
in complete freedom!

Compact and élégant, its conception and "leather goods" design guarantee complete discretion.

- AVAILABLE IN 4 COLOURS*:
CHOCOLATE, CAMEL, CARMINE OR GREEN.

- Each module corresponds to one day's treatment.
- Sensory markers for each dose (tactile markers).
- A chart for your important medical information and a space for storing your prescription.

Dimensions :
15,3 x 13,2 x 4,7 cm

Mini →

The pill dispenser that adapts to your treatment

Dimensions :
12,2 x 7,9 x 3,3 cm

Module with
removable
separators

■ **Extremely compact and chic**, its conception and “leather goods” design guarantee complete discretion. Ideal for travel!

- Possibility of removing the separators depending on the number of doses each day: 1, 2 or 3.
- AVAILABLE IN 2 COLOURS* :
MOUSE GREY OR CHOCOLATE.

■ **Weekly pill dispenser, containing:**

- 7 ergonomic modules with up to 3 squares per module (1, 2, 3).
- The square separators are mobile and removable to alter the size and/or number of squares depending on your treatment: from 1 to 3 doses a day.
- A chart for your important medical information and a space for storing your prescription.

Smart →

For nomads with cardiovascular treatment!

■ **Complete with its storage spaces for tablets, capsules and sachets.**

- Leatherette design and gentle touch sensation.
- AVAILABLE IN 2 COLOURS* :
ANISEED/BROWN OR BEIGE/CARAMEL.

■ **Weekly pill dispenser, containing:**

- 7 ergonomic modules and 4 squares per module (morning, noon, evening, night).
- 7 storage spaces for dosage forms or card holder for health insurance cards, etc.
- Each module corresponds to one day's treatment. A different colour indicates the first day's treatment.
- Sensory markers to indicate each dose.
- A chart for your important medical information and a space for storing your prescription.

Dimensions :
18 x 12 x 3,5 cm

Pilbox

The dynamic pill dispenser

■ **Stuck to the wall or placed on the kitchen table** this pill dispenser is an indispensable aid to take your treatment at home.

- Sturdy and spacious, it can go anywhere thanks to its "special travel" closure.

■ **Weekly pill dispenser, containing:**

- 7 ergonomic modules and 4 squares per module (morning, noon, evening, night).
- Each module corresponds to one day's treatment. Automatic scrolling of the modules as the week advances.
- Hook for wall mounting.
- Sensory and visual markers to indicate each dose.

Dimensions :
15 x 13 x 5 cm

Classic

Your treatment by one press!

■ **Patented press-button system:** delivers medication with each press. Thanks to the fully opening lid that provides access to all squares, this pill dispenser can quickly be filled in one go.

■ **Weekly pill dispenser, containing:**

- 28 squares.
- 4 squares a day (morning, noon, evening, night).
- Sensory and visual markers to indicate each dose.
- A chart for your important medical information.

Dimensions :
21 x 11,8 x 3 cm

**Patented
system**

■ Daily →

Dimensions :
11 x 6 x 2,6 cm

For a daily use

■ Compact, it is intended for taking medication daily.

Ideal for travel or if on the go.

- AVAILABLE IN 2 COLOURS* :
TANGERINE OR OLIVE.

■ Daily pill dispenser, containing:

- 4 separate squares on the top for capsules and tablets + 1 large compartment on the bottom that can carry a blister pack, an ampoule, a sachet or a homeopathy tube.
- Up to 4 doses a day (morning, noon, evening, night).
- Sensory markers to indicate each dose (pictograms and numbered markers).

■ Cutter →

The effective, safe pill splitter!

■ A pill cutter that's very easy to use for splitting large and small tablets.

- AVAILABLE IN 4 COLOURS*
BLUE, ORANGE, BEIGE OR GREEN.

■ Intended for patients:

- who need to cut their medication in accordance with their treatment.
- who have difficulty swallowing large tablets.

■ Characteristics :

- precise and easy to use: the pill is cut by closing the box.
- safe: the blade is inaccessible to avoid contact with the fingers.
- 2 in 1: cuts and stores. The unused part of the tablet is kept in the storage compartment.

■ The advantages:

- Precise: no need to center the tablet to be cut, the "pusher" guides and positions it precisely for a clean cut.
- Small, light and safe, the Pilbox® Cutter can be carried in your pocket or your bag.
- Compact: its modular design means it can be stored in the case of the Pilbox® Liberty.

Dimensions :
10,7 x 2,5 x 2,1 cm

Tempo →

A week's treatment at a glance!

Well-designed and practical

The PILBOX® Tempo pill dispenser helps you to organise your week's treatment with a small number of pills in a single daily dose. It holds your medication very discretely and ensures that you take the prescribed dose each day.

- AVAILABLE IN 4 COLOURS*
TURQUOISE, ORANGE, GREY OR GREEN.

Characteristics :

- **Accurate monitoring of treatment throughout the week:** 1 compartment, which can hold up to 6 pills, for each day.
- **Easy to refill** in one go for the entire week.
- **Highly discreet** thanks to the opaque lids.
- **Check what medication you have taken** simply by looking through the transparent bottom.
- **Well-designed and compact:** it can be taken anywhere.

Intended for patients:

- Active, mobile people who take a light treatment in a single daily dose.

Dimensions :
13 x 5,5 x 2 cm

*Models and colours may vary depending on the country.
